

Product Descriptions

MS-VA1501 is a Sampling Swab with Viscose tip & Aluminum stick used for cell and virus specimen collection, and it also has been used for the urethral sampling and clinical diagnostics. The head is made of medical grade viscose, it is high density and no easy to fall off, the aluminum stick is thin and tough, thus it could collect the samples from narrow urethra. The design is perfect and it is easy to use, the tip is harmless to micro-organisms, and it would enhance the specimen collection.
